

Family Report for the Virginia Interagency Coordinating Council
6-13-01

- Families who have been fortunate enough to participate in the MIMS State Review Team Visits have had an overwhelmingly positive response to the experience! All of the parents who participated stated that they had learned a lot. They also were appreciative of the support that Cathy Fisher, Mary Ann White, and other SRT members gave them.
- Families who reviewed the Service Coordination Training Curriculum recently developed were pleased with what they reviewed.
- The Family Involvement Project staff are looking forward to working with the Ability To Pay Workgroup to help in educating families on the new ATP process. Families who have reviewed the new process seem to be pleased with what was developed, but have expressed concerns about the possibility of their localities losing money through this new system.
